

Student Achievement Math 2010-2011

CRT Data Math:

As explained in the Language Arts section, Liberty Academy partnered with Harmony Education group in the 2010-2012 school year. We have separated the test scores according to the school programs as shown in the graphs below. Those listed as distance students are those who were harmony students or come for a few days a week at the school. The following are scores from each grade level in Mathematics.

At all levels but pre-Algebra those from the distance or homeschool/Harmony population are much less proficient. The level of proficiency for students at Liberty Academy seemed to depend on the year. In 3rd, 5th and 6th grades students at Liberty were at level with the state or above. In 4th, 7th and in the upper grades students did much worse than the state average. Overall, Liberty was below the average state proficiency in Math by 6%, and the distance or homeschool students were 24% below the state average for the 2010-2011 school year.
